1. Incorrect type of «dash» symbol

A sentence with a complicated construction should use a long dash symbol — other symbols are not suited for this task.

A numbers range – like p.15–180 – should have a delimeter called "medium dash". You can also use mathematical expressions instead of number ranges - maybe that'll look a lot more intuitive to people who're supposed to read your assignment.

A small dash is used rarelly (There're only 10-15 of them in each book with some books containing 20—30 while suggested amount is $30 - 50$) and is a symbol that people put between very-complicated words that have 2 parts that comprise them.

This chapter has covered a very–complicated topic of "dash" symbols.
